

It is my understanding that FCC has introduced a new broadcast service known as LPFM and that you propose to expand this service and have take priority over current FM services. I listen to KLOVE and so do millions of other people. It is the one alternative to music that we have. It provides not only uplifting and safe music to my family and others but provides a great service to the community by giving hope, encouragement safe entertainment for the whole family. I believe that to limit FM is to limit freedom and alternative to us as Americans and sounds too much like censorship and control of the masses on what FCC and those in government will allow us to hear and the choices that is our right and what makes us American.
